

The Livvi is the most complete access control solution on the market. With its unique design, integrated with cutting-edge ASSA ABLOY technologies, it is the most modern in access control.

From now on, to open your door, you will only need your smartphone, whether iOS or Android. But if you prefer, we also support the most advanced access cards and PIN code. And of course, we still have mechanical pantograph keys to maintain your safety.

With Livvi, you can manage access from anywhere in the world, being able to choose who and when should have access, for example, for a guest who will stay for 1 week or an employee, who should only have access from 8am-6pm on Mondays and Wednesdays, for a period of 30 days. All of this from your smartphone or computer or integrated into your management system.

Technical Specs

Wireless Communication	Bluetooth Low Energy (BLE)
Unlock Methods	Smartphone, PIN Code, MIFARE® Classic and mechanical key
Power	4 AA Batteries
Material	Aluminum Alloy, Glass, ABS and Stainless Steel
Weight	2 Kg
